Projects

AI-based Traffic Management System

- Developed a smart AI-based traffic system for real-time monitoring and adaptive signal control.
- The system analyzes live traffic data to optimize signal timing, ensuring smoother traffic flow and reduced delays
- Used Machine Learning, Deep Learning, IoT Sensors, and Computer Vision to reduce traffic congestion.

Web-based Quiz Application

- Created a web quiz app using HTML, CSS, and JavaScript with features like MCQs, timers, scoring, and replay.
- Designed for dynamic question rendering and user-friendly interaction.

Achievements & Activities

- Attended Data Structure Workshop at CETPA Infotech
- Visited Delhi Metro Rail Corporation (DMRC) Lab
- Completed Cloud Jam Arcade 2023 Certification
- Solved 100+ DSA problems in Java on LeetCode
- NPTEL Certification: DSA using Java
