

Ishaan Patel

Greater Noida, India

+91 7007635116 ishaanpatel29976@gmail.com [LinkedIn](#) [Github](#)

TECHNICAL SKILLS

Programming Languages: C, Java, Python

Model Development and Deployment : Scikit-learn, Streamlit, Flask

Data Visualisation, processing and analytics : Matplotlib, seaborn, pandas, numpy, streamlit

Database: MySQL, SQL

Tools: Git, GitHub, Google Colab, Pycharm, AWS, Flask, Scikit-learn

Communication Skills: Hindi, English

Core Subjects: DSA, OOPs, Operating Systems, Computer Networks, DBMS

PROJECTS

Illustra: Interactive Data Visualisation platform with Deepseek API integration - [GitHub](#)

Tech Stack: Python (matplotlib, streamlit, pandas, numpy)

MAR 2025

- Developed a data visualization platform that transformed raw CSV/Excel data into **10+ interactive charts** and graphs, enabling users to extract insights with zero coding knowledge.
- Implemented user-friendly interfaces and **customizable charts** to cater to diverse data analysis needs.
- Integrated DeepSeek API, allowing users to auto-generate insights and train models, reducing manual analysis time by **30-50% on average**
- Used Python libraries like Streamlit, Matplotlib, Seaborn, Pandas, NumPy, and scikit-learn to support end-to-end data processing, modeling, and visualization for datasets up to 100,000+ rows.

Credit Score Classification - [GitHub](#)

Tech Stack: Python, scikit-learn, tensorflow, pandas, numpy

JUN 2024

- Built a neural network-based system that allows users to input their financial details and classifies their credit score into three categories: low, average, and high, with **90.19% accuracy**.
- Constructed a user friendly UI, allowing individuals to assess their creditworthiness easily, **tested with 15+ users** and refined on their feedback.
- Used Python and ML libraries (TensorFlow, scikit-learn) for backend logic, and Streamlit to deploy an interactive UI, **reducing analysis time by 40% compared to manual assessment**.

Wander AI - [GitHub](#)

Tech Stack: Python, streamlit, pandas, numpy, HTML, CSS

OCT 2024

- Created a travel recommendation system that helps users discover destinations based on their preferences (feelings).
- Designed an intuitive, user-friendly web interface enabling users to explore **20+ destinations**, view travel details, and plan trips with 30% less time spent on research.
- **Integrated databases** to provide real-time information on destinations, enhancing the user experience.
- Utilized Python and modern web frameworks like Streamlit to develop an interactive and visually engaging user experience, with response times under **2 seconds**.

EDUCATION

Galgotias' College Of Engineering And Technology

Bachelor of Technology - Computer Science And Engineering (Artificial Intelligence and Machine Learning)

NOV 2022 - JUL 2026

Takshila Academy

12th Graduate (CBSE Board) - 91.84% (Physics, Chemistry, Maths) AUG 2020- AUG 2021

Takshila Academy

10th Graduate (CBSE Board)- 93% 2018-2019

ACHIEVEMENTS AND CERTIFICATIONS

- 3rd place in BITWARS Hackathon organized by JEMTEC Noida. [Link](#)
- Served as Club Coordinator at Lingo Freaks (literary club, GCET).
- Collaborated with a team of 40 people to organize Galgotias' first ever MUN
- Currently pursuing **Complete Data Science And Machine Learning Program** certification at [Geeks for Geeks](#).
- Serving as Club Head of Sorotic Pegasus, the women and child empowerment club of GCET.
